

# International Geomagnetic Reference Field – 2000

International Association of Geomagnetism and Aeronomy (IAGA)  
Division V, Working Group 8<sup>1</sup>

**A b s t r a c t:** The principles used in the derivation of the series of International Geomagnetic Reference Fields (IGRF) are described, with particular information concerning the production of the IGRF2000.

**Key words:** IGRF, geomagnetic reference field, geomagnetic field model, secular variation
