

INTERMAGNET OpsCom activities. Geomagnetic standards for instruments and observatories; geomagnetic formats

O. Rasmussen
Danish Meteorological Institute¹

A b s t r a c t: Since the start of INTERMAGNET the organisation has been chaired by the Executive Council, who deals with international participation, and communicates with national agencies and international scientific and funding agencies, and the Operations Committee (OpsCom) who advises the Executive Council on matters relating to instruments, data collection and processing, standards for observatories etc.

The paper will deal with all aspects of the OpsCom activities. This includes GIN-operation and the INTERMAGNET homepage presentation. Other subjects will be the Technical Manual, The IMO application form, Geomagnetic standard for instruments and observatories and Geomagnetic formats. Also the processing and checking of the annual CD-ROM's is described.

Key words: geomagnetic observatories, geomagnetic standards
