

## Contribution to the solution of vector potentials by means of Green's integral formula

J. Sisáková

Department of Applied Mathematics, Faculty of Economics, Technical University<sup>1</sup>

E. Vargová

Department of Theoretical Physics and Geophysics, Faculty of Natural Science, P. J. Šafárik University<sup>2</sup>

**Abstract:** In *Vargová and Sisáková (1999)* the additional conditions for the solution of the direct problem of magnetometry were derived on the base of the comparison of scalar potentials obtained by using Green's formula and Moisil-Theodorescu integral formulas.

**Key words:** Green's formula, vector potential
